Come Join Our Team – We Need You!

Position: Product Builder / Implantable Medical Devices

Location: Spiddal, Co. Galway

Hours: 39 hours per week, Mon – Friday (occasional Saturdays) days

Rotation: We have 2 vacancies on the day shift and 1 vacancy on the evening shift

Contract: Temporary, 6 months, potential to extend/permanency

About us: Aran Biomedical is a trusted partner in design, development and manufacture of implantable medical devices. We are looking to increase our Operations Team as we continue to work with some of the largest medical device organisations globally. You'll be joining an innovative and close-knit (though socially distancing) team in a beautiful part of the country.

What you'd be doing: As a Product Builder you will be responsible for the manufacture, product-inspection, testing, labelling & packaging of Class II / III medical device implant products within a Clean room environment. All operations are conducted under stringent quality control systems to GMP standards. The successful candidate will work as part of a team to maintain high quality/performance/delivery standards on all Aran Biomedical products.

Skill's you'll have: The successful candidates must have a leaving certificate qualification or equivalent level of education is required. Relevant experience in a medical device-manufacturing environment is desirable, but not essential. All roles involve a high degree of manual dexterity for which any previous technical experience will be an advantage.

Where to next: If you are interested in applying, or would like more information, please contact us at HR@aranbiomedical.com
